OMID HEIDARI
Software Developer

✉ info@heidariomid.com 📞 +98 937 379 8553 🏃 Military exemption
🌐 heidariomid.com github/heidariomid linkedin/heidariomid

Software developer with advanced skills in ReactJS, Next.js, Redux, GraphQL, and Tailwind CSS. While my focus is on the front-end, I have a good understanding of back-end technologies such as Node.js, TypeScript, and design patterns. While I have not yet had the opportunity to work for a company, I have dedicated myself to advancing my skills through self-learning in academies like 7Learn and Udemy and have done a lot of advanced personal projects. I prefer working on the front end because it allows me to see the finished product and the design process. Seeking to join a dynamic team and deliver exceptional results while growing professionally.

WORK EXPERIENCES

Freelance Software Developer
2021 - Present

- Built several user-friendly front-end projects using ReactJS and Next.js for clients from diverse industries.

- Collaborated with clients to understand their requirements and develop solutions that met their needs while ensuring a great user experience.

Kish Exchange (IT Departmant)
2017 - 2020

Started with no prior programming experience or knowledge in this role

- Developed skills in user research, requirements gathering, and design thinking to improve the UI/UX of projects.

- Created small WordPress projects, enhancing my skills in web development and content management systems.

- Designed logos, posters, and social media content to enhance the company's online presence and brand identity.

- Produced tutorial videos to educate users and improve engagement with the company's products and services.

PROJECTS

UberEats Project
code | demo

This was an advanced project from Nomad Coders that I worked on, where I added several features and functionality to enhance the user experience, including:

- Implementing a payment gateway using a design pattern

- Improving the UI/UX by customizing the design for each dashboard

- checkout page
- cart system
- order history
- protected pages
- local storage persistence
- light/dark mode

Crypto Currency Project
code | demo

NextJs application that fetches and displays live cryptocurrency data using the React Query library, with the ability to preFetch data and cache it.

- bulit with Next.js
- pagination
- fully responsive
- query caching and prefetching of data
- search functionality
- easy to extend
- error handling
- minimal & clean

SKILLS

Technical

Proficient with:

React//NextJs/Redux

Material-UI/TailwindCSS

TypeScript/GraphQL

HTML/CSS/JavaScript

Familiar with:

NodeJs/NestJs/Express

PostgreSQL/MySQL/MongoDB

Soft Skills

Communication

Problem-solving
